

Ahmet Gökem Duran

Electrical & Electronics Engineering Student

Kayseri, Türkiye | +90 553 670 1805 | iamahmetgorkem@gmail.com | linkedin.com/in/ahmetgorkem

SUMMARY

Electrical and Electronics Engineering student with three years of hands-on experience in technical operations, field maintenance, and cross-functional product development. Familiar with PCB design and assembly, including schematic capture, board layout, and hand soldering of prototype boards. Skilled in diagnosing and maintaining industrial equipment, coordinating across engineering and operations teams, and applying CAD/3D modeling tools to support product design. Looking to bring technical rigor and practical problem-solving to an entry-level engineering role.

EDUCATION

Erciyes University

BSc Electrical and Electronics Engineering

Kayseri, Türkiye

PROFESSIONAL EXPERIENCE

TNC Group

Türkiye | 07.2026 – 08.2026

Architecture & Engineering Professional Development Intern

- Supported product development and industrial design projects using SketchUp and Rhinoceros 3D for 3D modeling and prototyping.
- Collaborated with interdisciplinary teams to integrate electrical systems into physical product designs across each stage of development.

Çelebi Ground Handling

Türkiye | 04.2024 – Present

Workshop Engineer

- Perform maintenance, diagnostics, and firmware/software updates on motorized and towable ground support equipment.
- Identify technical faults and implement reliability improvements in compliance with safety procedures.
- Coordinate communication between airport stations and technical teams to standardize operational processes.
- Prepare inspection procedures and reports to support troubleshooting and performance evaluations.

Çelebi Ground Handling

Türkiye | 04.2023 – 04.2024

Ramp Operations Agent

- Supported aircraft turnaround and daily ground handling activities in a fast-paced airport environment.
- Operated under strict aviation safety procedures while coordinating with operational teams to maintain efficient, disciplined, on-time performance.

Eylül Elektronik

Türkiye | 02.2023 – 03.2023

PCB Design & Assembly Intern

- Designed simple single- and double-layer PCBs, including schematic capture and board layout, under senior engineer supervision.
- Assembled prototype boards by hand (through-hole and SMD soldering) and performed basic continuity and functional checks.

SKILLS

Technical Skills

PCB & Circuit Design: Altium Designer, KiCad, Proteus, DesignSpark

Programming & Analysis: MATLAB, Python

3D Modeling & Prototyping: SketchUp, Rhinoceros 3D

Core Competencies: PCB design & assembly, circuit simulation, industrial design & prototyping

Other Software: HTML, CSS, JavaScript (foundational front-end), WordPress, Microsoft Office, Unity Engine, Canva

Languages

Turkish (native)

English (advanced)
